We now acquire natural and synthetic rubber from producers worldwide and distribute to the rubber industry via our North American warehouses or ship directly to our customers

Our decades worth of experience in the rubber industry have given us the best networks of producers and transportation providers to give our customers the highest quality products and most reliable service. Our long history is from making innovation our core strength and constant improvement being our focus.

We can add value to your company through knowledgeable advice and efficient purchasing. Call us for details.

NATURAL RUBBER	SYNTHETIC RUBBER	SPECIALTY RUBBER
Astlett sells all grades of natural rubber and we stock most of them throughout North America. Whether you need a general fire grade or a specialty grade for a specific purpose, we will fit.	There are many different grades of synthetic rubber available from many areas of the world. Astlett specializes in finding offshore produced equivalents to domestic sources at attractive prices.	Natural Rubber is also available in a number of special chemical and physical forms. Astlett Rubber does regular trade of several specialty grades of natural rubber.
<a href="#">Enter the Natural Rubber Page</a>	<a href="#">Enter the Synthetic Rubber Page</a>	<a href="#">Enter the Specialty Page</a>
CARBON BLACK	TITANIUM DIOXIDE	ZINC OXIDE
Carbon Black is a raw material widely used for many applications. Astlett supplies carbon black from a few high quality sources with grades including furnace, thermal and channel blacks.	Astlett sells Titanium Dioxide to be used as a pigment in rubber applications. Advantages include a high refractive index, consistent particle size, dispersibility and improved UV resistance.	Zinc Oxide (or zinc white) is used as a pigment in a number of industries including rubber compounding. Astlett sells three major types from a number of producers.
